

Primary Care Case Management Report

**215 ILCS 170/47
Public Act 095-0650
HB1628**

July 2017

201 South Grand Avenue East
Springfield, Illinois 62763-0002

Telephone: (217) 782-1200
TTY: (800) 526-5812

September 1, 2017

Governor Bruce Rauner
Members of the Illinois General Assembly

On behalf of the Illinois Department of Healthcare and Family Services (HFS), I present the Fiscal Year 2017 annual report on the Illinois Primary Care Case Management Program (Illinois Health Connect). This report is required by the *Covering ALL KIDS Health Insurance Act* [215 ILCS 170/47].

Illinois Health Connect links individuals to Primary Care Providers at assigned medical homes, ensuring access to needed primary and preventive healthcare services. Illinois Health Connect also assists clients not currently eligible to participate in a managed care plan in locating providers for services and making appointments as needed.

Under the Governor's Health and Human Services Transformation and HFS' managed care reboot, Medicaid managed care will be expanded to every county in Illinois and include the transition of individuals currently enrolled in the Illinois Health Connect program, beginning in calendar year 2018. Approximately 80 percent of Medicaid beneficiaries will be enrolled in managed care plans, an increase from the 60 percent who are currently enrolled in such plans today.

HFS is committed to improving access quality health care coverage for Medicaid beneficiaries throughout our state.

We are available to answer any inquiries you may have regarding this report.

Sincerely,

A large black rectangular redaction box covering the signature of Felicia F. Norwood.

Felicia F. Norwood
Director

REPORTING REQUIREMENTS

SUMMARY

The *Covering ALL KIDS Health Insurance Act* was amended by PA 95-650 [215 ILCS 170/47] to require that HFS report annually to the General Assembly by September 1 of each year concerning the numbers of providers participating in the program.

215 ILCS 170-47

The Department shall report annually by September 1, on the following:

- (a) The number of professionals serving in the primary care case management program, by licensed profession and by county, and, for counties with a population of 100,000 or greater, by geo zip code. (See Appendix B, Table B.1)*
- (b) The number of non-primary care providers accepting referrals, by specialty designation, by licensed profession and by county, and, for counties with a population of 100,000 or greater, by geo zip code. (See Appendix B, Table B.2)*
- (c) The number of individuals enrolled in the Covering ALL KIDS Health Insurance Program by income or premium level and by county, and, for counties with a population of 100,000 or greater, by geo zip code. (See Appendix C)*

INTRODUCTION

The Primary Care Case Management program serves children and adults and connects each eligible client with a Primary Care Provider at a medical home where regular ongoing care is received. Through a medical home, enrollees receive coordinated care, decreasing inappropriate and costly care, such as emergency room visits or hospitalizations.

The Program Overview provides more information about the current Primary Care Case Management program and efforts that have been implemented to assist both HFS clients and providers navigate the program and build upon the medical home concept.

Primary Care Case Management Program Summary

Illinois Health Connect

Clients enrolled in Illinois Health Connect continue to receive both care coordination and case management services from their Primary Care Provider (PCP) at their assigned medical home. Clients that must select a PCP in Illinois Health Connect for their medical home include most children enrolled in All Kids, adults, and seniors and adults with disabilities in the non-mandatory counties. The program focuses on the promotion of the patient-physician relationship in order to improve the quality of healthcare for members, support continuity of care initiatives, increase access to care, and reduce unnecessary emergency room visits and hospitalizations through established medical homes.

As of July 1, 2017, Illinois Health Connect provided care coordination for almost 321,000 individuals in the non-mandatory counties and also served as the primary resource for individuals that are currently excluded from mandatory participation in a managed care program.

Illinois Health Connect Call Center

The Illinois Health Connect call center assists clients and providers in achieving access to care, including primary and preventive care. In FY17, the Illinois Health Connect call center averaged nearly 15,000 calls per month. Calls coming into the call center cover a variety of client and provider issues including:

- Changing PCPs
- Health plan education on benefits, co-pays, care coordination
- Assistance with making appointments with their PCPs
- Assistance with coordinating access to specialty care
- Responding to provider inquiries on program changes
- Assistance with quality tools that support the PCP's efforts in managing and coordinating care for clients

Client Education and Outreach Assistance

Illinois Health Connect utilizes outreach and education strategies to help members better understand the importance of their medical home, how to access care with their PCP, how to request care coordination and the importance of health and wellness for them and their family members. IHC regularly provides direct outreach to clients that are due for services based on HFS claims data and in accordance with programs such as the Early Periodic Screening, Diagnostic and Treatment (EPSDT) program. During this past program year, IHC conducted 188,947 outreach calls and mailed 236,603 notices to both children and adults reminding them of the importance of regular checkups with their PCPs, and getting regular health related services, such as immunizations.

Medical Homes

There are currently over 5,200 PCPs and many provider and community groups across the state that work directly with IHC in order to provide access to care for their members. Illinois Health Connect works directly with providers through a dedicated toll-

free provider helpdesk and has stationed service representatives in the field to facilitate direct outreach and education efforts with providers, including distributing information on HFS programs, assistance with billing and use of the MEDI system, assisting with quality improvement efforts, understanding the use of claims data to identify which members are due for services, and to also drive improved access to care through sharing of best practices with participating PCPs.

Physicians that participate as a medical home for clients are enrolled as an Illinois Health Connect PCP. PCPs serve as a client's medical home and coordinate the client's primary and preventive services, including well-child visits, immunizations, screenings, and follow-up care as needed. The PCPs also issue referrals to specialists for additional care or tests as needed. Through these medical homes, clients have access to quality care from a provider that understands their unique health care needs and receives the advantages of care coordination and case management. Appendix B, Table B.1, provides the unique number of professionals enrolled as Medicaid providers as of June 30, 2017, by licensed profession, by county, and, for counties with a population of 100,000 or greater, by geo zip code. In most non-mandatory counties throughout Illinois, the medical home capacity for eligible clients is double the number of eligible clients in the county. This expansive network continues to provide clients with medical home choices and increased access to care.

Quality Tools

Illinois Health Connect provides support services and educational opportunities for PCPs and their staff. These support services include monthly Webinars and training opportunities on topics that impact providers' practices, and surveys to obtain provider feedback on the program and participation in Program Subcommittee meetings. Often the educational opportunities are provided by Illinois Health Connect in conjunction with support from community-based organizations. Illinois Health Connect also provides the PCPs and their staff with access to the following tools to assist them in coordinating care for their members:

- **Panel Rosters** – Electronic panel roster accessed through the Department's secure MEDI system. Panel rosters help providers manage their client's care by identifying clients that are enrolled with the PCP and may be due for screening or checkups based on HFS claims data.
- **Claims History Summaries** – HFS claims-based client health summaries for Providers with authorized access to the HFS MEDI system. The health summaries include client medication and immunization histories, previous lab orders, hospitalizations and other medical procedures. With the claims history of a client, a PCP is able to review the client's medical history, assist in assessing additional medical needs and determine compliance with on-going medical care.
- **Provider Profiles** –PCPs receive a profile report summarizing their individual performance on specified clinical indicators in addition to an aggregate summary of the performance of all PCPs participating in the Illinois Health Connect program. The data reflected in the Provider Profiles is gathered from HFS claims data.

Specialty Resource Database

Illinois Health Connect assists members and PCPs in connecting with specialists for specialty care, through their Specialty Resource Database (SRD). The SRD provides specific information on the circumstances under which specialists are available to provide care to an eligible client. A specialist's registration in the SRD allows Illinois Health Connect to assist PCPs in directing clients to the most appropriate specialist provider. A breakdown of specialists by licensed type and specialty, by county and by geo zip code for counties with populations of 100,000 or greater is provided in Appendix B, Table B.2.

Illinois Health Connect Medical Home Edit Program

In Illinois Health Connect, patients are required to see their assigned PCP, or a provider or clinic affiliated with their assigned PCP for primary and preventive care. PCPs seeing Illinois Health Connect patients who are not enrolled on their panel, or on an affiliated PCP's panel, on the date of service, must obtain a referral from the patient's assigned PCP in order to be reimbursed by HFS for services provided. During FY17, PCPs entered over 570 referrals per month.
