

HBIS Program - FY26 Dashboard Charts

The following data is an analysis completed by HFS for the Health Benefits for Immigrant Seniors program. The purpose of this analysis is to present the program's enrollment and liability data to stakeholders and the public in a consumer-friendly way.

FY26 Trended Cost (Spending Dollars in Millions)						
Ages	Estimated PMPM	Mar FFS Enrollment	Mar MCO Enrollment	July-Mar Liability	Apr-June Proj. Cost	Total Proj. Costs
65+	\$1,456	419	6,556	\$89	\$30	\$119

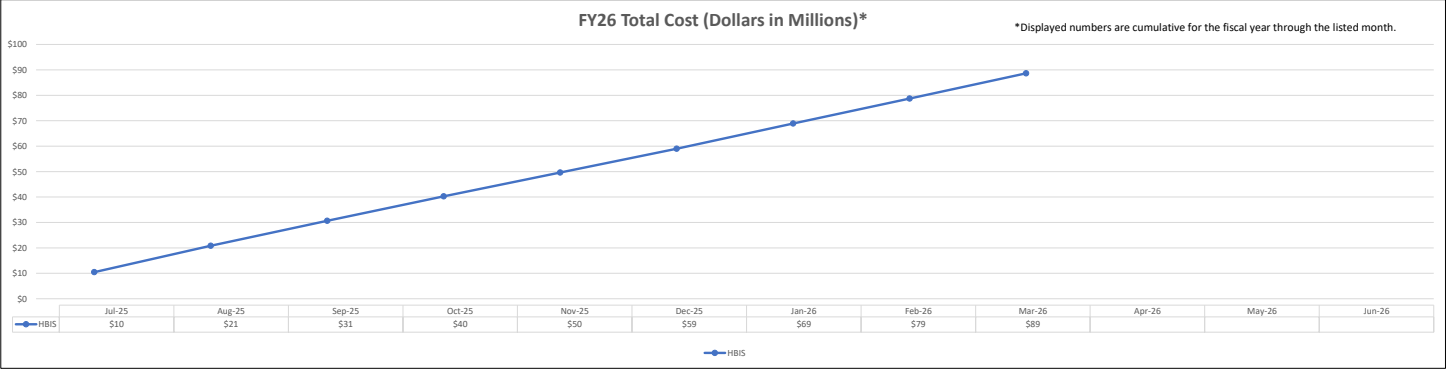

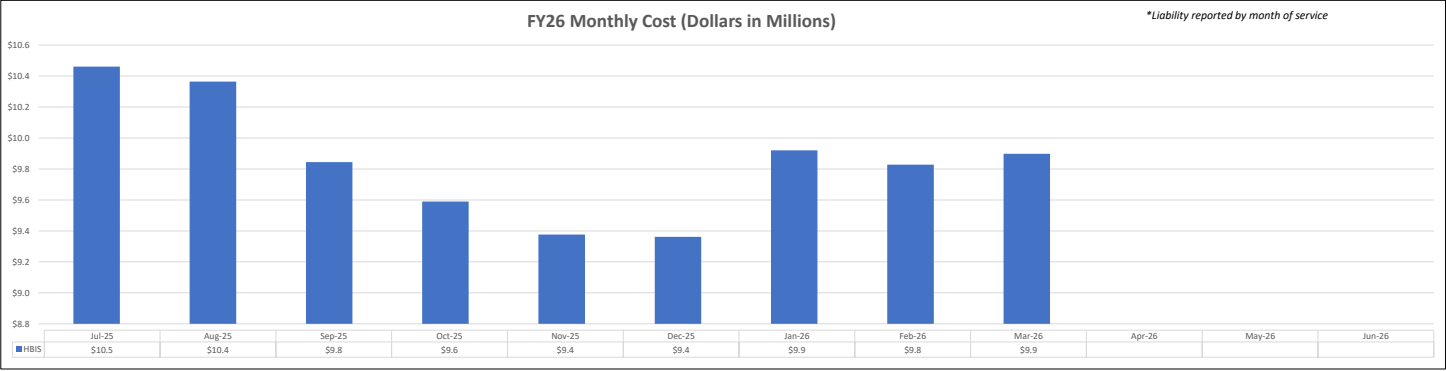

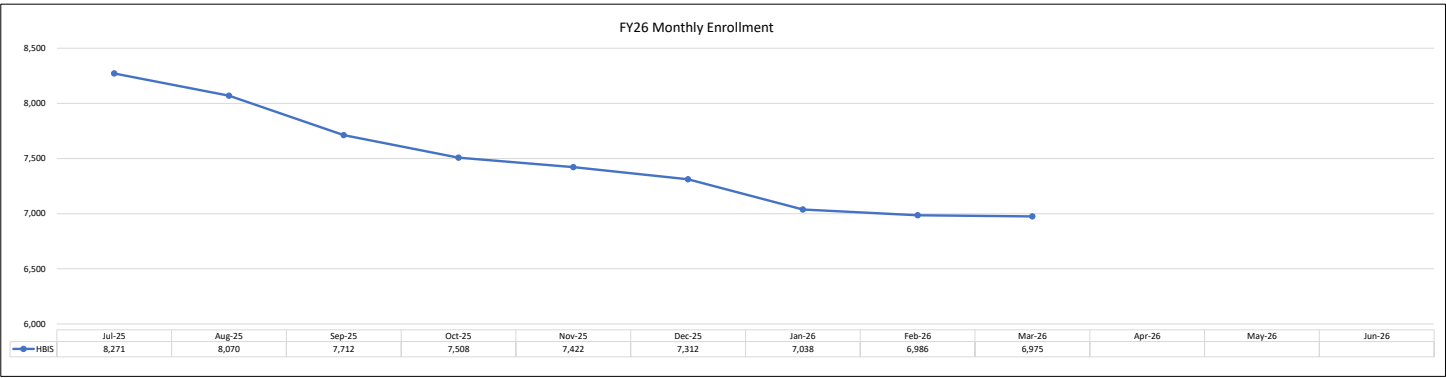

1 - The FY26 Trended Cost table estimates 12-month costs using the most recent month's enrollment and projected PMPM rates for the HBIS population. Total projected costs equal service from liability to date plus projected costs, which are based on current enrollment and estimated managed care PMPM rates.

2 - HBIS actual costs may fluctuate due to retroactive claims adjustments. Projected costs may also fluctuate due to enrollment and rate experience. The Department's actuarial vendor periodically updates capitation rates based on program experience to ensure rates remain actuarially sound.

3 - FY26 liabilities are presented using a date of service methodology. This approach aligns costs to the period when services were actually provided and reduces timing fluctuations that can occur as claims are adjusted, reprocessed, or finalized across fiscal years.

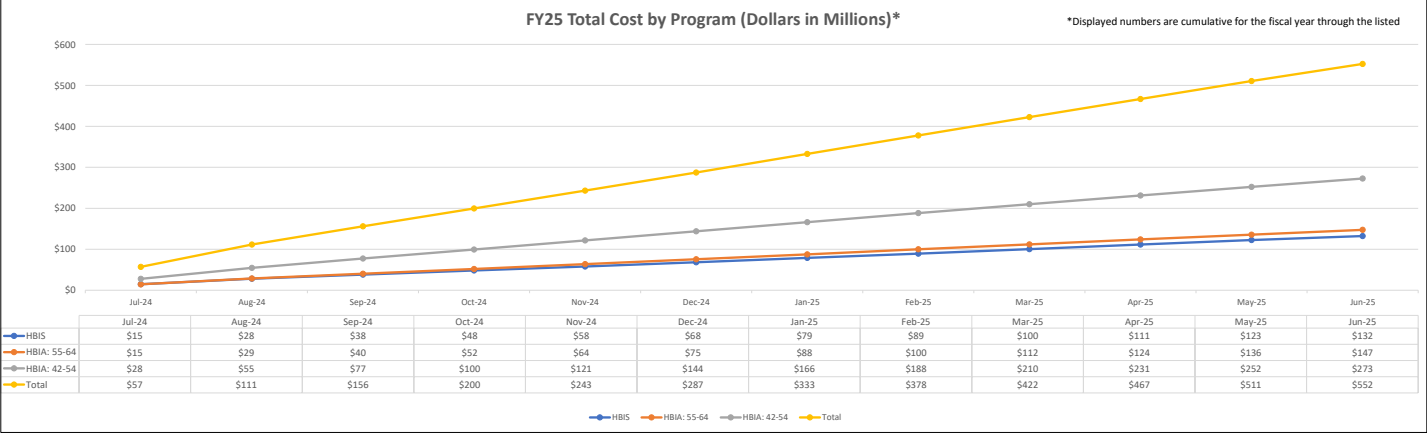

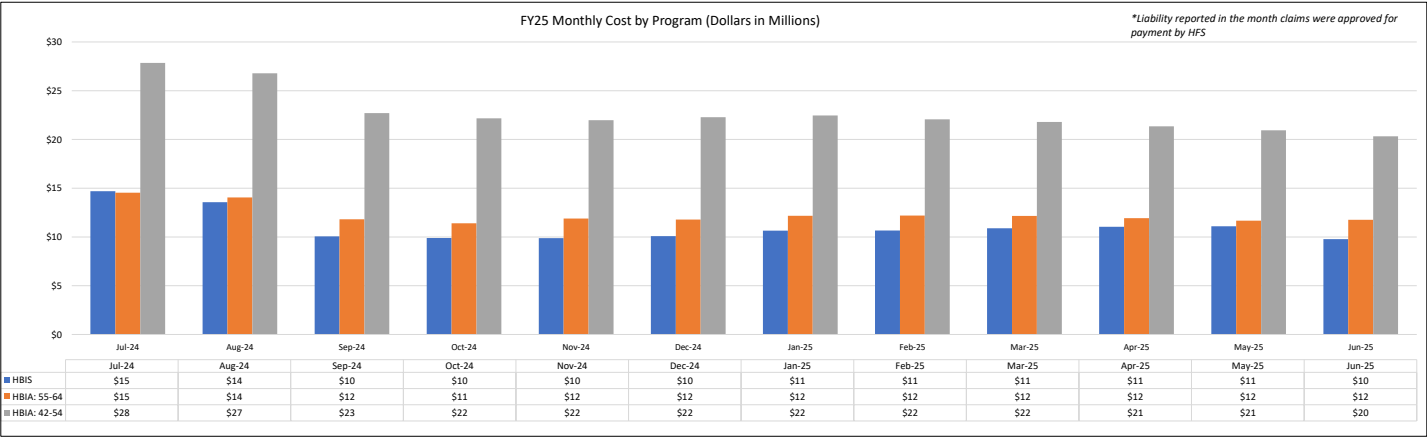

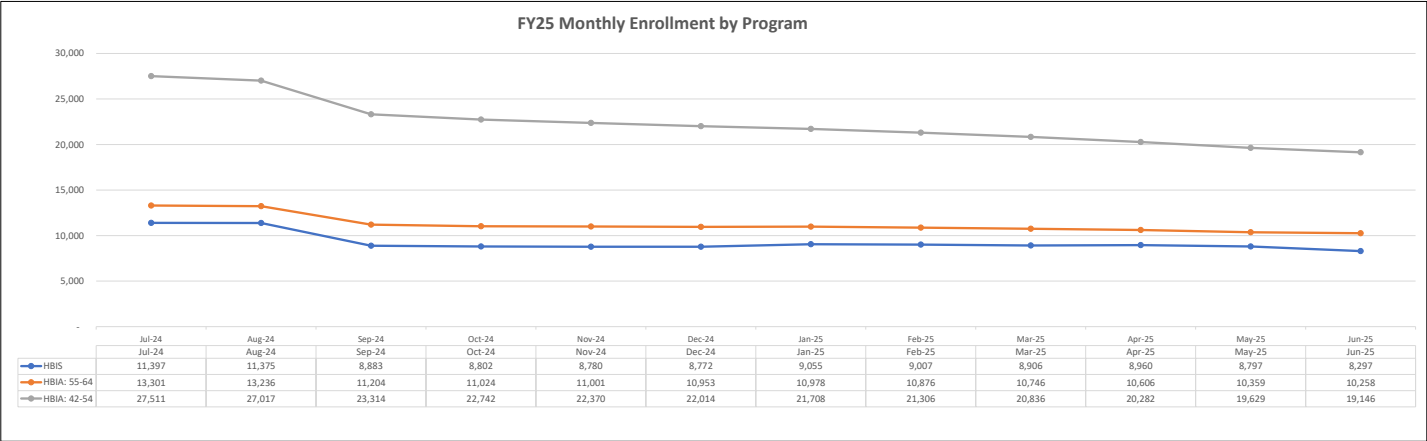

4 - Estimated PMPM rates reflect current managed care rates and are subject to change with program experience.

5 - The Health Benefits for Immigrant Adults (HBIA) program sunset effective June 30, 2025.
