- II. Roll Call was taken.
- III. No conflicts of interest.
- IV. The January 11, 2024, meeting minutes were unanimously approved.
- V. PDL Drug Appeals

A. Product: Vraylar

Presented by: Neelesh Nadkarni, PharmD, MSPH, Medical Outcomes & Science Liaison

Presented Material Highlights:

- Once daily
- Four indications
- D3 preferring mechanism of action
- Longest half-life of 1 week
- Neutral metabolic profile
- Minimal sedation

Discussion Highlights:

- Well tolerated with coverage of all 4 indications
- We need to expand access to these medications to decrease hospitalizations.
- By the time patients get to a psychiatrist they have likely already tried 1st line drugs
- Commercial insurance companies do make patients fail generics first
- Significant utilization
- Metabolic neutrality plays a role in patients adherence
- Side effect profile in general is a huge determinant in adherence
- Prevention of long-term metabolic issues is important
- Should have metabolic monitoring
- Due to psychiatrist shortages, primary care doctors need a larger tool box
- No studies show superiority to preferred agents

Motion: Dr. Berkowitz moved to make Vraylar preferred.

 - For Rett's Syndrome
 - Severe and rare neurodevelopment syndrome
 - Loss of hand and fine motor symptoms
 - Approved for 2 years and above
 - Diarrhea in 80.6% was main side effect
 - Guidelines do not mention since this was recently approved
 - Only drug for core symptoms of Rett's

Discussion Highlights:

- Very low evidence of efficacy with high incidence of side effects
- 60% in study had no response
- Reviewing on a case by case basis
- Not enough clinical evidence at this time to fully back this as preferred

Motion: Dr. Patel moved to leave non-preferred
Second: Dr. Vergara-Rodriguez
Motion passed without dissent.
