- Current Oversight Process
- ACE presentation

Overview of Contractual Requirements

Section 5.29 of the HealthChoice IL Medicaid Contracts.

- MCOs are required to make payments to Providers for Covered Services on a timely basis consistent with the claims payment procedure described at 42 U.S.C. § 1396a(a)(37)(A) and 215 ILCS 5/368a.
- MCOs are required to pay:
 - 90% of clean claims within 30 days
 - 99% of clean claims within 90 days
- Complaints or disputes concerning payments for the provision of services shall be subject to the Provider complaint resolution system.

Note: "clean claim" means a claim from a Provider for Covered Services that can be processed without obtaining additional information from the Provider of the service or from a Third Party

HFS

Illinois Department of
Healthcare and Family Services

Current Oversight Process

HFS regularly reviews MCOs claims processing trends.

- Pursuant to Public Act 100-0580, HFS publishes an analysis of hospital claims processing every 6 months.
 - **In Q2 2024, 98% of claims were adjudicated/processed in 0-30 days¹.**
- HFS plans to enhance reporting and transparency on claims processing by using data collected directly through its ACE pipeline project for hospitals and other provider types.
 - Conducted working sessions to walk through logic requirements, testing and validation.

Agenda

- 1 Introductions
- 2 What is the ACE Solution?
- 3 Stakeholders
- 4 ACE Member Edits Pilot Program
- 5 Analytics Dashboards
- 6 Use Cases
- 7 Q&A

What is ACE?

ACE stands for **Advanced Communication Engine**. It's a system created by Optum to help the State of Illinois manage healthcare claims more efficiently, especially for Medicaid services.

(Illinois Public Aid Code: (305 ILCS 5/5-30.12)

How Does ACE Work?

ACE has **three main parts** that work together:

1. Smart Claims Gateway (iEDI):

- Think of this like a digital mailroom.
- It receives and sends healthcare claim files between hospitals, doctors, insurance companies, and state systems.
- It makes sure the right information goes to the right place quickly and securely.

2. Claim Checking Engine (ACE Engine):

- This part checks claims before they are officially processed.
- It looks for mistakes or missing information and predicts if a claim will be accepted or rejected.
- If there's a problem, it sends a message back explaining what needs to be fixed.

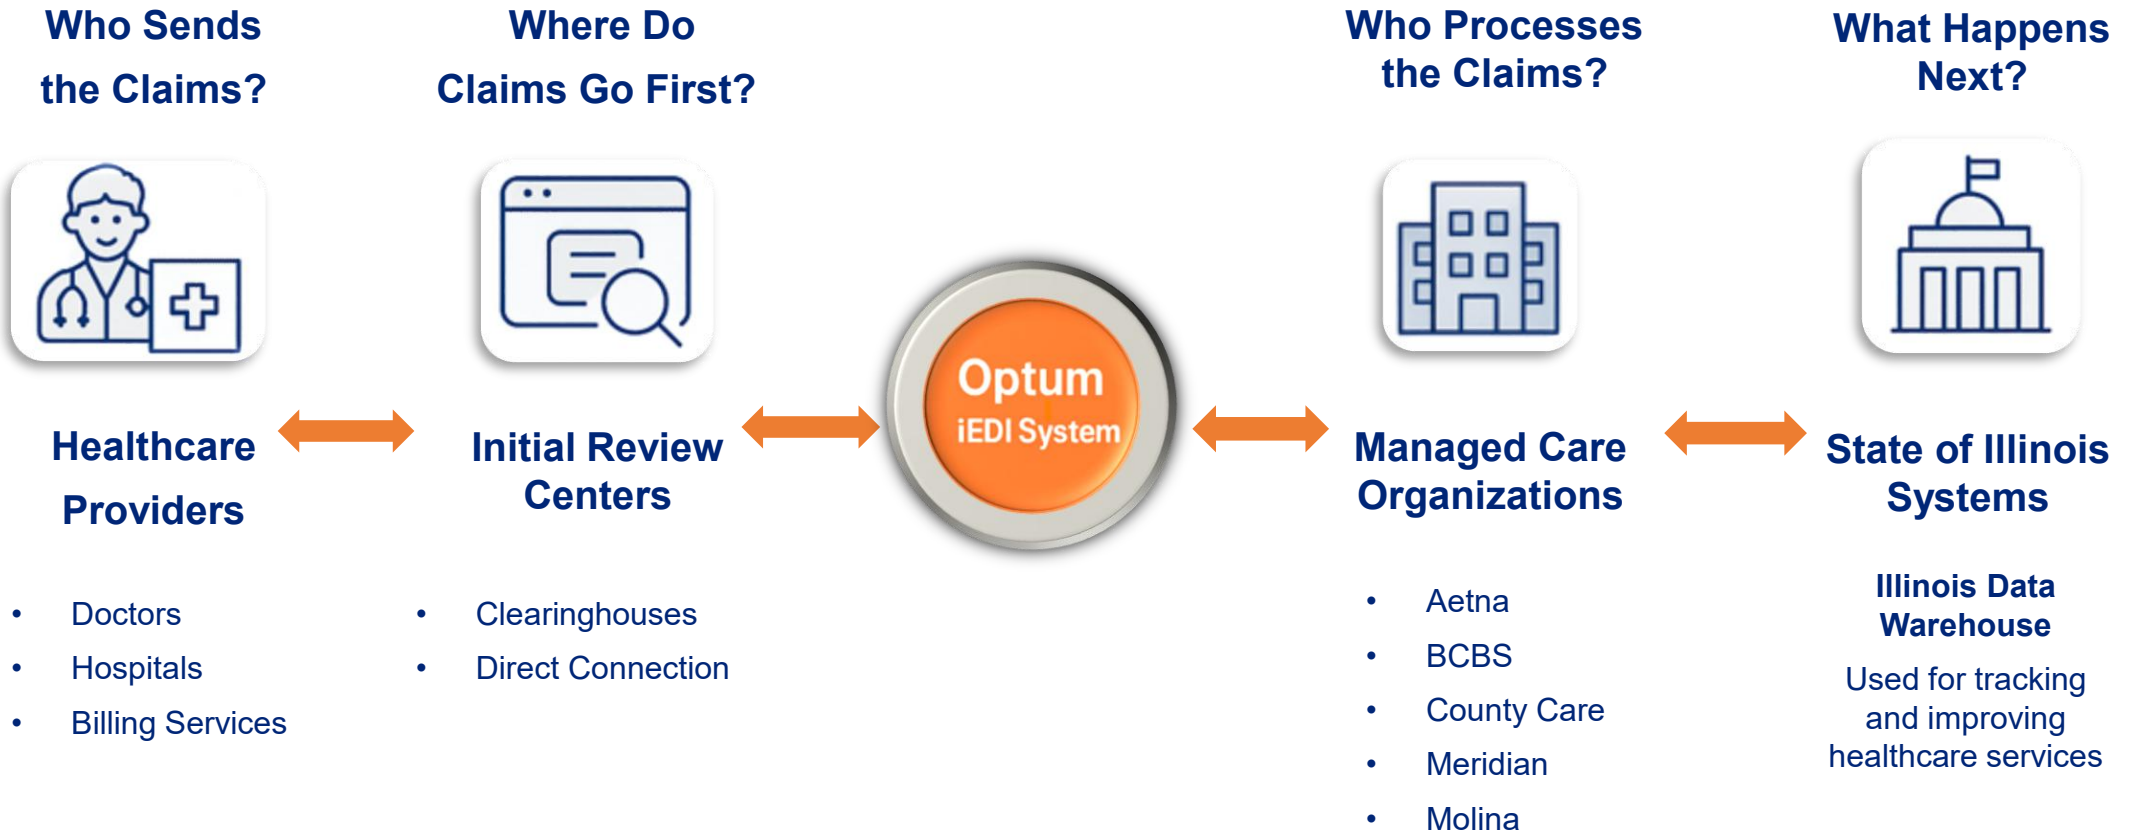

3. Reporting Tools (ACE-EDW):

- These tools create easy-to-understand reports.
- They help the state and healthcare providers see how claims are being handled.
- This helps everyone make better decisions and improve how healthcare payments are managed.

Why Is ACE Important?

- It helps reduce errors and delays in processing healthcare claims.
- It gives hospitals and insurance companies clear feedback so they can fix issues faster.
- It supports better care for patients by making sure providers get paid correctly and on time.
