

- 1) Open pdf document
- 2) Click on Tools

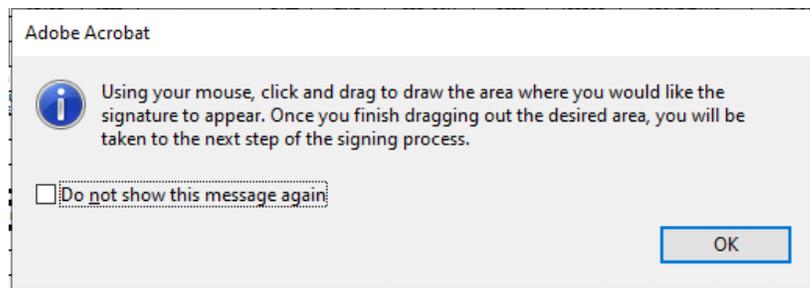

- a.
  - i. Click on Certificates

1.
  - ii. Click on Digitally Sign

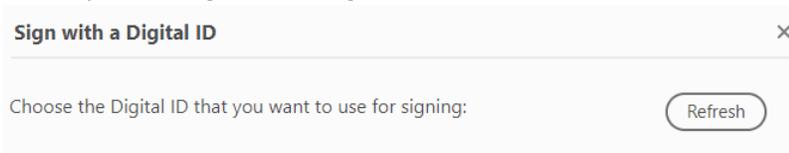

- iii. Click OK

1.
  - iv. This will change the cursor to a + and will allow you to create a box where the signature should be placed

1. This will then open the Sign with a Digital ID box

- a.
- b. Choose your digital ID
- c. If you do not have a digital ID you will need to select Configure New Digital ID

- i.

## Configure a Digital ID for signing

A Digital ID is required to create a digital signature. The most secure Digital IDs are issued by trusted Certificate authorities and are based on secure devices like smart card or token. Some are based on files.

You can also create a new Digital ID, but they provide a low level of identity assurance.

### Select the type of Digital ID:

#### Use a Signature Creation Device

Configure a smart card or token connected to your computer

#### Use a Digital ID from a file

Import an existing Digital ID that you have obtained as a file

#### Create a new Digital ID

Create your self-signed Digital ID

Cancel

Continue

ii.

## Select the destination of the new Digital ID

Digital IDs are typically issued by trusted providers that assure the validity of the identity. Self-signed Digital ID may not provide the same level of assurance and may not be accepted in some use cases.

Consult with your recipients if this is an acceptable form of authentication.

#### Save to File

Save the Digital ID to a file in your computer

#### Save to Windows Certificate Store

Save the Digital ID to Windows Certificate Store to be shared with other applications

Continue

iii.

## Create a self-signed Digital ID

Enter the identity information to be used for creating the self-signed Digital ID.

Digital IDs that are self-signed by individuals do not provide the assurance that the identity information is valid. For this reason they may not be accepted in some use cases.

Name

Jane Doe

Organizational Unit

Bureau of XYZ

Organization Name
