

# What is Pathways to Success?

Pathways to Success is a new program that offers additional home and community-based options for you and your family. Pathways to Success is here to help your family with areas of conflict or crisis while also keeping your child and family together at home.

## Pathways to Success

### High-Fidelity Wraparound & Intensive Care Coordination

A family-driven approach to providing care where a Facilitator partners with you and your family to identify what you want your family to look like and how to get there. This process includes your family choosing a team, that could include family, friends, neighbors, and/or service providers. As a team, everyone works to find creative ideas and solutions that fit the style of your unique family. If your family chooses to participate in either of these services, the following services can be offered as part of the Pathways to Success program.

### Intensive Home-Based

A team comes to your home to explore the root of ongoing crisis and build skills that you and your family choose to help your child succeed.

### Family Peer Support

Caregivers with lived experience and/or similar family experiences provide support to you as a caregiver while you navigate your family's journey to change.

### Therapeutic Support Services

Specialized therapy methods and services for your family. Some examples could include art, dance, or music therapy.

### Therapeutic Mentoring

Your child and a mentor work one-on-one in the home or community to develop skills that you and your family choose.

### Individual Support Services

Activities, services, and goods that support health and wellness for your family. Some examples could include music lessons; programs for youth who require special accommodations including fitness, recreation or sports; and/or weighted blankets.

### Respite

When your family needs a break, a trusted professional can spend time with your child at home or in the community.
